DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 9 and 16-24, drawn to a method and system for providing outgoing call log involving an intelligent network, classified in class 379, subclass 116.
 - II. Claims 10-15 and 25-30, drawn to a method and system for providing outgoing call log involving an integration of circuit network and data network, classified in class 370, subclass 352.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, invention Group I has separated utility such as a method and system for providing outgoing call log involving an intelligent network; and Group II has separated utility such as a method and system for providing outgoing call log involving an integration of circuit network and data network.
3. The inventions are distinct, each from the each other because of the following reasons:
 - a. These inventions have acquired a separate status in the art as shown by the different classification
 - b. The search required for one Group is not required for the other group

For the reasons above restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.14 (b) if one or more of the currently named inventors is no longer art inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (h).
